

RAKSHA ADHIKARI

Final Year Student

8882618903 • rakshaadhikari697@gmail.com • [GitHub](#)

PROFESSIONAL SUMMARY

Final-year Computer Science student and AI/ML enthusiast with hands-on experience in software development, machine learning, and full-stack technologies. Proficient in C++ and experienced in developing web applications and implementing machine learning solutions for real-world problems. Passionate about exploring Artificial Intelligence, Machine Learning, and emerging technologies while building practical and impactful solutions. Actively seeking opportunities as a Software Engineer, Full-Stack Developer, or AI/ML Engineer to apply my skills and contribute to innovative products.

TECHNICAL SKILLS

- Programming Languages: C++, JavaScript, HTML5, CSS3, Python
- Frontend: React.js, Redux.
- Backend: Node.js, Express.js
- Databases: SQL
- Machine Learning: NumPy, Pandas, Scikit-learn, Matplotlib, Explainable AI.
- Tools & Version Control: Git, GitHub, VS Code, Postman

PROJECTS

Tata Tele Services | Web Development Intern

June 15, 2026 – July 31, 2026

VayuPrice Calculator | <https://pricing-calculator-bv0k.onrender.com/>

- Developed a web-based pricing calculator to automate cloud service price estimation based on user-defined parameters.
- Implemented dynamic pricing calculations and an interactive interface, reducing the need for manual quotation calculations.

Breast Screening Assistant | <https://github.com/raksha05-ui/finalyearProject.git>

- Developed a deep learning-based breast screening assistant using a Convolutional Neural Network (CNN) to analyze breast images and assist in identifying suspicious cases.
- Trained and evaluated the CNN model for image classification and integrated the trained model into an interactive Gradio-based application for real-time prediction.
- Implemented an end-to-end workflow covering image preprocessing, model inference, prediction, and user-friendly result visualization.

Expense Tracker | github.com/karsha19/PennyPulse

- Developed a full-stack expense tracking application to help users log, categorize, and monitor personal expenses over time.
- Implemented CRUD functionality for adding, editing, and deleting transactions, with data persisted and retrieved via a backend API.

EDUCATION

Bachelor of Technology – Computer Science & Engineering | InderPrastha Engineering College

Expected Graduation: 2027

ACHIEVEMENTS & ACTIVITIES

- Active contributor to open-source repositories on GitHub (github.com/karsha19).
- Participated in hackathons, SIH.
- Contributed to team-based academic projects involving machine learning and software development.
- Maintained and developed projects on GitHub, demonstrating hands-on learning and practical implementation.
